Github: <https://github.com/amanmaurya39>

Email: maurya.aman.3952@gmail.com

Mobile: +91 7004843871

SKILLS

Languages: Python, SQL, JAVA

Databases: PostgreSQL, MongoDB, Apache Kafka

ML / Analytics: Pandas, Numpy, Scikit-learn, PowerBI, Exploratory Data Analysis (E.D.A)

Tools & Platforms: MongoDB, Github, AWS, Docker

Frameworks & Libraries: Scikit-learn, PyTorch, FastAPI, Flask

Soft Skills: Problem-Solving, Collaboration, Adaptability

INTERNSHIP

FutureSense | Internship Machine Learning Intern | [Github](#) Jun' 26 - Jul' 26

- Built an end-to-end RAG (Retrieval-Augmented Generation) system that allows students to upload any PDF textbook and ask natural language questions — receiving answers with exact page citations using Google Gemini and hybrid retrieval (BM25 + dense embeddings).
- Implemented hybrid retrieval pipeline combining ChromaDB dense semantic search and BM25 keyword matching (70/30 weighted), deployed on Streamlit Community Cloud with Google text-embedding-004 for vector generation.
- Extended single-document RAG to multi-document comparison — system retrieves from two separate ChromaDB collections simultaneously and generates side-by-side cited answers using [Doc A, Page X] notation.

PROJECTS

MindSync AI — Emotionally Adaptive Learning Assistant | [Github](#) May' 26

- Developed the learning intelligence engine for MindSync AI, an emotionally adaptive tutoring system that fuses facial emotion detection (DeepFace), keystroke dynamics, and sentiment analysis to personalize study content in real time.
- Built adaptive explanation and quiz-generation logic that adjusts difficulty and tone based on a student's fused emotional state, using Flask on the backend.
- Collaborated on a full-stack React + Flask application, integrating a live webcam mood-sensing dashboard with backend session tracking and analytics.

Event Planner API with Dashboard | [Github](#) Dec' 25

- Developed a role-based Event Planner REST API using FastAPI and PostgreSQL, implementing JWT authentication, bcrypt password hashing, and RBAC to separate organizer and user permissions.
- Designed a normalized relational schema (Users, Venues, Events) with SQLAlchemy ORM and built secure CRUD endpoints documented via Swagger UI.
- Built a live analytics dashboard using Plotly and Pandas, visualizing event distribution across venues, organizers, and time from live PostgreSQL data.

CERTIFICATES

AI Foundation Associate | [Oracle](#) Sep' 25

Database Management System | [Infosys](#) Aug' 26

Java | [Infosys](#) Aug' 25

ACHIEVEMENTS

- Solved 30+ DSA problems on LeetCode and other coding platforms.

EDUCATION

Lovely Professional University

Bachelor of Technology

Computer Science and Engineering; CGPA: 7.09

Phagwara, Punjab

Aug' 24 – Present

+2 HIGH School

Intermediate

Percentage: 68.2%

Buxar, Bihar

Mar' 23 – May' 24
